

Sub: Setting up quick health diagnostic units (HEALTH KIOSK's) in rural and public areas.

Respected Sir/Madam,

We take pleasure to acknowledge you that we are working upon the projects of supplying, installation, operation & maintenance of quick health diagnostic units (HEALTH KIOSK's) in rural and public areas in association with local governing / implementing bodies. Under the project of UP government Health ATM Machines, we have installed more than 200 Health KIOSK's. We are also working in more than 15 states.

Our aim to work on similar projects in other states with a motive to provide instant and accurate health diagnostic services at relatively cheaper cost to villagers in tribal areas, CHC's/ PHC's center, schools, corporate office. By regularly checking up for health and adopting the relative control measures.

Healthcare KIOSK's assesses and performs various health checks. It can perform more than 75 types of health checks, including invasive (Glucose, Hemoglobin, Cholesterol, HbA1c etc., Strip based rapid test) and non-invasive (Height, weight, body temperature, Blood pressure, pulse oximeter, ECG) health tests in few seconds in some cases up to 15 minutes. On a real-time basis, machine performs Health checks & extracts data from the calibrated devices and components. With its proactive Monitoring capability, this system is capable to guide/recommending an individual with an appropriate Health routine, Food habits & reminders on consultation to Medical experts using voice command and various social media platforms and as and only if consented by an individual/patient.

One of its biggest benefits is health care access in rural and remote areas, thus improving quality of care. Healthcare kiosk enable patients to self-manage the intake process without any assistance. This reduces administrative paperwork and saves significant hours of staff time. Hence, the staff can utilize their time for more pressing tasks. It is providing a means to control costs. This KIOSK is suitable in PHC, Sub centers, RPHC'S, CHC Centers, UPHC's, City Clinics, public places or etc.

Implementing Healthcare kiosks in hospitals can reduce costs for the facility. This will also save the hospital from using paper, filing the forms, and allows them to quickly look up information on that particular patient with adding token system. Additionally, with Healthcare kiosks, we can do the primary health checkups of doctors, staff, nurses and patient relatives. Health Kiosks to upgrade the primary healthcare services in the rural areas that face the. It provides full body checkup within minutes and disseminates primary and preventive healthcare services through Point of Care testing devices. It also preserves Patients' Medical Records in digital format for providing better healthcare services to the patients. Corporate can include health kiosk as a part of their employee health welfare activities and utilize Kiosk for better health management of their employees. It can play a vital role in correcting lifestyle habits and behavior. It will also motivate employees to follow healthy lifestyle and in long term result in reducing absenteeism and long leaves.

Upgrading point of care facilities at Primary Healthcare Centers, Health kiosks can be utilized at public places as a health and wellbeing check point that allows users instant body checkups, on the go. At places like airport and railway stations where passengers are waiting, it can be used to allow people get a quick check up. This puts their waiting time to a good use. For providing daily fitness report and healthy life of Army Jawan and Police healthcare kiosk plays an important role in army force office. In this pandemic situation, in the school or colleges, health checkup and attendance for the students become easy with the help of healthcare Kiosk.

Hence, we are encouraged to submit this proposal for setting up quick health diagnostic units (HEALTH ATM) projects for Rural and Public regions and healthcare centers.

We look forward to work in accordance and guidance provided by you and we hope that your honor will find us competent for the same.

Your Truly

Mr. Satish Shrikhande

PRODUCT NAME

DIGITAL HEALTHCARE KIOS

LIST OF REACTIONS INCLUDED IN HEALTH KIOSK

MODEL NO. 1

Sr. No.	Test type	Test List
1.	Vital checkup	Height, Weight, BMI, BMR, Body Water, Fat free weight, Muscle Mass, Skeletal Muscle, Body Fat, PSUBFAT, Visceral fat, Bone Mass, Body temperature, Oxygen Pulse, BP Diastolic, Bp Systolic, Basal Metabolic rating, Metabolic Age, Physical rating, Health score
2.	Blood test	Glucose test
3.	Basic checkup	Alcohol test
4.	Heart Check	12 Lead ECG
5.	Eye checkup	Distance vision test, Near vision test, Astigmatism test, Colour vision deficiency test, Dry eye test
6.	ENT checkup	Ear, Nose, throat Visualization Skin and Nail Image Capturing
7.	risk assessment test	HIV Risk test Lung Cancer Risk Test Breast cancer risk test Brain cancer risk test Tumor risk test Cervical Cancer Assessment Heart disease Risk test Covid risk test IQ Test

MODEL NO. 2

Sr. No.	Test type	Test List
1.	Vital checkup	Height, Weight, BMI, BMR, Body Water, Fat free weight, Muscle Mass, Skeletal Muscle, Body Fat, PSUBFAT, Visceral fat, Bone Mass, Body temperature, Oxygen Pulse, BP Diastolic, Bp Systolic, Basal Metabolic rating, Metabolic Age, Physical rating, Health score
2.	Blood test	Glucose test Hemoglobin test
3.	Lipid profile	Total cholesterol Low-density lipoprotein (LDL) High-density lipoprotein (HDL) Triglycerides LDL HDL Ratio
4.	Basic checkup	Alcohol test
5.	Heart Check	12 Lead ECG
6.	Eye checkup	Distance vision test, Near vision test, Astigmatism test, Colour vision deficiency test, Dry eye test
7.	ENT checkup	Ear, Nose, throat Visualization Skin and Nail Image Capturing
8.	risk assessment test	HIV Risk test Lung Cancer Risk Test Breast cancer risk test Brain cancer risk test Tumor risk test Cervical Cancer Assessment Heart disease Risk test Covid risk test IQ Test
9.	Urine test	Glucose, Ascorbic Acid, Bilirubin, Ketone, Specific Gravity, pH, Protein, Urobilinogen, Nitrite Leukocytes

HEALTH ON WHEELS

To make preventive diagnosis a simple and hassle-free process, we are introducing Health on wheels which transform healthcare delivery by offering instant health check-ups in remote area. Operated by the android application, it supports a wide range of vital assessments and stores patient data on the cloud in order to make it accessible remotely. The device is easily portable, allowing you to deliver quality care anytime, anywhere.

Health On Wheels It is a mobile van hospital service that made healthcare available to the region that has less or no access to such kind of healthcare facilities. It can perform more than 75 types of health checks, including invasive (Glucose, Hemoglobin, Cholesterol, HbA1c etc., Strip based rapid test) and non-invasive (Height, weight, body temperature, Blood pressure, pulse oximeter, ECG) health tests in few seconds in some cases up to 15 minutes. One of its biggest benefits is health care access in rural and remote areas, thus improving quality of care.

ADVANTAGES OF USING HEALTH KIOSK:

1. INSTANT HEALTH CHECKUP:

Healthcare KIOSK's assesses and performs various health checks. It can perform more than 75 types of health checks, including invasive (Glucose, Hemoglobin, Cholesterol, HbA1c etc., Strip based rapid test) and non-invasive (Height, weight, body temperature, Blood pressure, pulse oximeter, ECG) health tests in few seconds in some cases up to 15 minutes. On a real-time basis, machine performs Health checks & extracts data from the calibrated devices and components. With its proactive Monitoring capability, this system is capable to guide/recommending an individual with an appropriate Health routine, Food habits & reminders on consultation to Medical experts using voice command and various social media platforms and as and only if consented by an individual/patient

2. COST EFFECTIVE SOLUTIONS:

Implementing Healthcare kiosks in hospitals can reduce costs for the facility. This will also save the hospital from using paper, filing the forms, and allows them to quickly look up information on that particular patient with adding token system.

3. IMPROVE QUALITY OF HEALTHCARE:

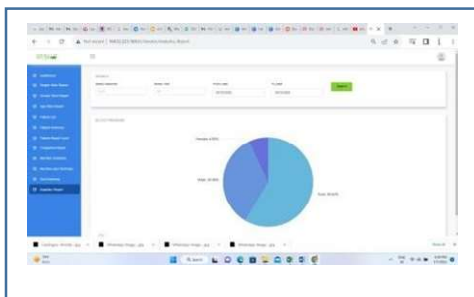

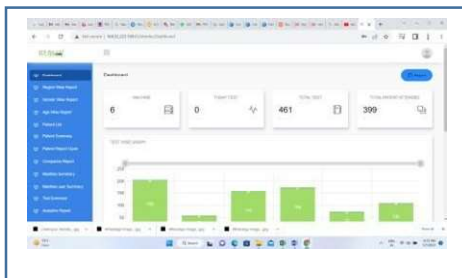

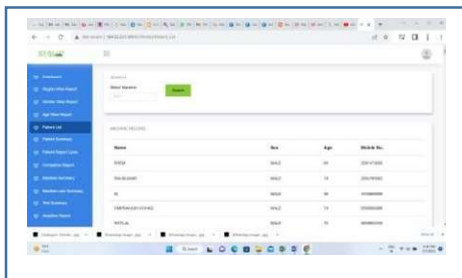

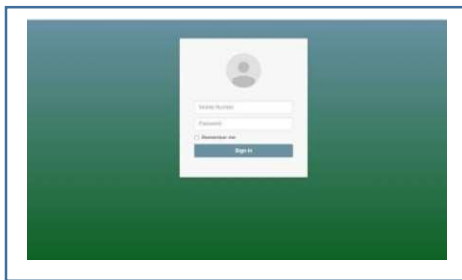

One of its biggest benefits is health care access in rural and remote areas, thus improving quality of care. Healthcare kiosk enable patients to self-manage the intake process without any assistance. This reduces administrative paperwork and saves significant hours of staff time. Hence, the staff can utilize their time for more pressing tasks. It is providing a means to control costs. This KIOSK is suitable in PHC, Sub centers, RPHC'S, CHC Centers, UPHC's, City Clinics, public places or etc.

4. DIGITAL RECORD:

It is an electronic health record is the systematized collection of patient information and Health record electronically stored health information in a digital format. Patient onboard enables patients register and update their health records.

This data is the graphical representation of the medical checkups which is done on the KIOSK. It can be evaluated or differentiate by different types of health checkup of the patients.

Every machine will provide User Id and password for data Analytics. Patient data such registrations, Health record will be Stored on to the server. This helps maintain the patient data and health reports. Every Kiosk having their user Id password

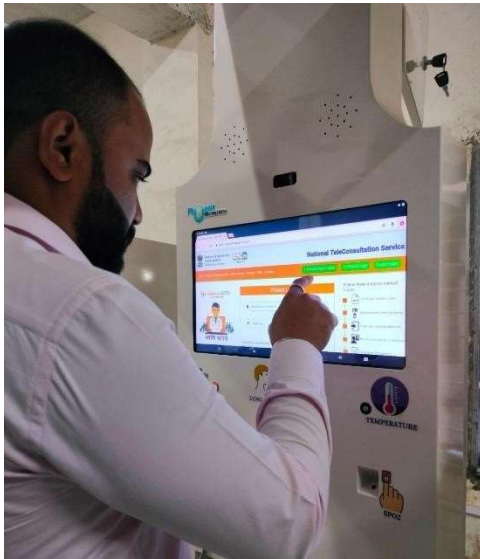

Points of analytics

1. Region wise report
2. Gender wise Report
3. Patient list
4. Age wise report
5. Patient summary
6. Patient report cycle
7. Comparison report
8. Machine Summary
9. Machine User summary
10. Test summary
11. Analytics report

5. ONLINE DOCTOR CONSULTATION (INTEGRATION WITH E SANJEEVANI):

System having a facility of doctor consultation (Integration with E- Sanjeevani) .The app lets a patient consult a panel of doctors across the state that not just gives a medical opinion based on symptoms but also generates an e-prescription as well. Salient features of eSanjeevani OPD are: Patient registration, Token Generation, Queue Management, Audio-Video Consultation with a Doctor e Prescription SMS/Email Notifications Serviced by State's Doctors Free Service Fully configurable (no. of daily slots, no. of doctors/clinics, waiting room slots, consultation time limit etc).

E Sanjeevani Government OPD portal is integrated with the system. Patient can get free consultation and prescription throughout this. They can also upload their test report and can get the consultation and prescriptions accordingly.

Using eSanjeevani OPD is a simple 4 step process to help patients get the consultation they need. wait for patients to call you for a consultation 3. Accept & join the call and help the patients with a consultation 4. Complete the consultation and issue e prescription online.

E- sanjeevani portal requires one-time registration. Patients need to be create user ID and password. Profile of the patient will show into the patient login.

It also data storage facility all patient data (Profile & past health reports) will show onto the portal. Patient can select the district hospitals or state hospitals It shows the available doctor list. He need to select the doctor for particular injuries and get the consultation.

SOME TESTOMONIALS:

Soon, 4600 health centers in Uttar Pradesh to be equipped with 'Health ATMs': CM YOGI ADITYANATH

Stating that the Uttar Pradesh government is committed to providing a solid health infrastructure in the state, Chief Minister Yogi Adityanath on Wednesday said that the 'Health ATMs' will bring about a 'revolutionary

"Health is a matter of public interest, and the government is committed to giving every citizen access to rapid, convenient, and cutting-edge medical and testing. In the next three months, the government will install high-tech health ATMs at all 4600 PHC and CHCs in the state with the goal of enhancing public health," Yogi remarked.

Under this project we have installed more than 50 machines in CHC and PHC center in the Uttar Pradesh
